MERCURY LIGHTING | 2018
THE BASICS
A Handbook of High-Quality, Affordable LED Luminaires
We have compiled our most affordable LED luminaires into one useful booklet. Giving up performance and quality is never an issue when using any of the LED luminaires contained in these pages. We engineer out costs while keeping in our high standards.

The LED modules and drivers used are the same systems used in our architectural series. All lenses and diffusers are also the same as used in our architectural series. So feel confident in any of these products from a lighting company with more than 70-years in business and covered by our 5-year LED warranty.
